ABOUT US

PDS is a veteran-founded security solutions provider specializing in drone evasion, intervention, and prevention training, as well as threat and vulnerability assessments.

Our mission is to deliver combat-tested expertise and tailored security solutions to government, corporate, and critical infrastructure clients facing the growing threat of UAS and Electronic Warfare.

PAST PERFORMANCE

Our team served in Ukraine as part of a special operations battalion, gaining firsthand experience countering drone surveillance, targeting, and attack in active combat. This operational expertise is reinforced by prior service in both the U.S. and British military across multiple disciplines. Together, these backgrounds enable us to deliver professional, combat-tested instruction and threat assessments grounded in both unconventional warfare and conventional defense practices.

CORE CAPABILITIES

Dismounted UAS Survivability Assessment

Embedded evaluation of unit exposure, detection latency, and behavioral vulnerability under persistent small-UAS observation.

Adaptive Intervention & Risk Reduction

Real-time behavioral modification and survivability refinement during live exercises or work-ups to measurably reduce drone-driven risk.

Counter-UAS Human Layer Integration

Augments existing detection, EW, and base-defense systems by strengthening the dismounted force's ability to operate below sensor and jammer layers.

Readiness & Validation Support

Structured survivability validation integrated into training cycles, experimentation events, and operational rehearsals.

Prime Vehicle Integration Support

Subcontract-ready capability designed to embed within existing IDIQs, sustainment programs, and modernization efforts.

WHAT MAKES US DIFFERENT

Veteran-led: Firsthand operational experience in drone-threat environments.

Practitioner-driven: Tactical expertise informed by real-world combat use.

Adaptive delivery: Training customized to mission and client requirements.

Outcome-focused: Emphasis on survivability, prevention, and response.
